SUMMARY

B.Tech student in Artificial Intelligence and Machine Learning with a strong foundation in algorithmic optimization and software engineering. Experienced in developing intelligent systems and conducting exploratory research in Explainable AI using Python and Java. Passionate about advancing foundational AI research to solve real-world, large-scale problems.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology

Bachelors of Technology in Artificial Intelligence and Machine Learning

Aug 2024 - May 2027

CGPA: 7.96

EXPERIENCE

Virtual Intern (AI Domain) — Infosys

Jan 2024 - Mar 2024

- Implemented Artificial Intelligence training, applying core concepts to problem-solving and gaining practical experience.
- Developed real-world use cases with AI, enhancing technical skills and domain knowledge effectively.

PROJECTS

Explainable AI for Student Performance Prediction (Research)

- Conducting foundational research on XAI techniques (SHAP, LIME, Partial Dependence Plots) to interpret opaque Random Forest Classifiers.
- Evaluating large-scale academic datasets to transition predictive algorithms into transparent, actionable insights for educational institutions.
- Addressing the "black box" barrier in machine learning to advance the state-of-the-art in trustworthy, AI-assisted decision-making.

AI Multimodal Healthcare Analysis System

Jan 2025 - Mar 2025

- Engineered a multimodal machine learning system using Python and Streamlit to pioneer advanced medical image and text analysis.
- Optimized algorithms for integrating computer vision and natural language processing to achieve high-accuracy health condition predictions.
- Designed an interactive web interface providing real-time input and prediction results.

FixDesk - Complaint Management System

Apr 2025 - Jun 2025

- Built a responsive complaint reporting system utilizing HTML and CSS for efficient issue tracking.
- Designed structured issue submission forms, focusing heavily on usability, UI/UX, and structured interface design.

TECHNICAL SKILLS

Languages: Python, Java, HTML, CSS

Frameworks & Libraries: Streamlit, TensorFlow, PyTorch, Keras, Scikit-Learn, Pandas

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS

Tools: Git, GitHub

CERTIFICATIONS

- **AI Practitioner: Ready To Use AI** — IBM

ACHIEVEMENTS & EXTRA-CURRICULAR

- **HackWithInfy 2026:** Qualified for Round 2 Face-to-Face technical assessment by solving complex algorithmic challenges.
- **Hackathons & Conferences:** Participated in the NYXORA national-level hackathon and attended Google Developer Group DevFest.
- **Programming Competitions:** Actively participated in the CodeStorm coding marathon.
